

I wish to tell you how much Air 1 radio helps me in the time when I am in the car. I suffer from depression and having Air 1 radio really helps me and tells me that there is hope for me, I just could not think of Air 1 radio not to be able to receive if you put it in the category of LPFM because I would probably not receive it and the message of hope will not be heard by me. Please do not lower the power of Air 1 radio, it helps me get through each day and helps me cope with my depression (as much as it can), so please still allow Air 1 radio keep their present signal.

I cannot imagine what the impact would be if Air 1 radio were put on LPFM, I think it would be a disserve to all who listen to Air 1 because Air 1 puts out a positive message, which, in my opinion, most stations do not put out over the radio air waves. Many stations are simply negative in their approach in what they put on the radio waves.

Air 1 makes such an impact on the local area that I live in. It promotes wholesome living for the public interest, which many station do not do. It gives a positive message to many of us who have problems. It is such a positive station, I am proud to listen to it while in my car.

Thank you very much.

Sincerely Yours,

Fred weamer
